HyperCard: Use 2.1 or Later with Macintosh Quadra (7/92)

=====
Article Created: 11 October 1991
Article Reviewed/Updated: 23 July 1992

TOPIC -----

HyperCard versions before 2.1 are incompatible with the 040 cache.

DISCUSSION -----

Workarounds:

- Use HyperCard 2.1 or later with Macintosh Quadra computers.
- If you must use earlier versions with a Quadra, turn off the cache CDEV in the Control Panel.
