AV Series: Software for Adjusting Video Brightness (1/94)

==

Article Created: 19 January 1994

TOPIC ---

Is there is any software to adjust the video brightness for my
AV Series Macintosh?

DISCUSSION ---

Specific applications, such as VideoMonitor, Fusion Recorder, PhotoShop,
or PageMaker, have software controls to adjust brightness. Currently,
there isn't a general control panel or application to do this. However,
most monitors and displays have contrast and brightness controls - either
physical knobs or specific control panels.

To locate a vendor's address and phone numbers, use the vendor name
as a search string.
