Newton Connection Kit for Windows: 386SX Compatibility (2/94)

===

Article Created: 24 February 1994

TOPIC ---

Does the Newton Connection Kit for Windows run on Windows-compatible computers
with 80386SX microprocessors?

DISCUSSION --

The Newton Connection Kit for Windows is only recommended for
Windows-compatible computers with 386DX or later microprocessors. Some
customers have been able to run the Newton Connection Kit for Windows on
386SX-equipped computers, but we do not recommend it.
