Newton: Mac Connection Kit 2.0 Format Files (3/94)

==

Article Created: 03 March 1994

TOPIC ---

When should we use Newton Connection import/export format in Newton Connection for Macintosh version 2.0?

DISCUSSION ---

The Newton Connection format can be used to:

• Move information between two Newton Connection synchronize files
• Distribute information to other people who have Newton Connection
• Move data to another application that supports Newton Connection format

This file format contains all Newton information and you are guaranteed not to lose data with this format. In the future, other applications may also support the format removing the need for translators and templates.
