Power Macintosh: Files on System Diskettes Are Compressed (3/94)

=====

Article Created: 29 March 1994

TOPIC -----

Why do all the files on the diskettes for my Power Macintosh appear as generic documents?

DISCUSSION -----

Due to space constraints on the diskettes, all the files have been compressed and as such must be installed via the Installer program, this includes the print drivers as well. It is not possible to drag copy the files from the diskettes.
