Power Macintosh: Error Launching FusionRecorder (5/94)

=====
Article Created: 24 May 1994

TOPIC -----

When launching FusionRecorder, the Power Macintosh shows the message:

"An Internal Error occurred. Please call technical support with the following information below:

Assertion failed: FALSE
File: tprint.c
Line: 48

Click Continue to ignore the error (risky), Fail to abort the operation (better), or Quit to quit VideoFusion (best). Quitting VideoFusion will prompt for files that need to be saved. "

What is causing this error?

DISCUSSION -----

This message will appear if Fusion Recorder is being launched by opening the Fusion Recorder Preferences file in the Preferences folder. To prevent this from occurring, launch Fusion Recorder by opening the application itself or by opening one of its movie files from the Finder.
