PowerBook 150: Description (7/94)

===

Article Created: 30 June 1994

TOPIC --

This article describes the Macintosh PowerBook 150 notebook computer. Note that the PowerBook 150 is functionally equivalent to the PowerBook 145B.

DISCUSSION ---

Overview

The Macintosh PowerBook 150 is the most affordable PowerBook computer. It's ergonomically designed with an integrated trackball and palm rest to work with easily on your lap. The display is infinitely adjustable for optimum viewing angle while the PowerBook itself has a two position tilt adjustment.

With the PowerBook 150's built-in floppy disk drive, Macintosh, MS-DOS, OS/2, and ProDOS diskettes can be formatted, read, and written to.

ClarisWorks and Apple Remote Access Client come pre-installed on the hard drive.

Power and Speed

• 33 MHz 68030 microprocessor.

Memory

• 4MB RAM, expandable to 40MB.

Display

• Backlit 9.5" Passive Matrix LCD, 640 by 480 pixels.

Expansion

- Two external ports (SCSI and printer/modem) to connect the PowerBook 150 directly into high-capacity hard disks, printers, modems, and AppleTalk networks. Internal expansion slots for modem and RAM.

System software

- System Software 7.1, with multitasking, File Sharing, Balloon Help, and TrueType fonts.

Networking

- Built-in AppleTalk networking provides networking capability that gives access to all the resources on an AppleTalk network.

Compatibility

- Ability to read, write, and format Macintosh, MS-DOS, OS/2, and ProDOS floppy disks.
