American Heritage Dictionary: Error Type -250 (3/97)

===

Article Created: 1 Jul 1994
Article Reviewed/Updated: 7 March 1997

TOPIC ---

When launching American Heritage Dictionary 3.0.1 I get an error of type -250.

DISCUSSION --

This can occur intermittently in version 3.0.1 of the American Heritage
Dictionary program. In the Memory control panel, if Virtual Memory is set to
more than 20 MB, an error of type -250 will result. As a temporary workaround,
you may reduce the amount of virtual memory to something less than 20 MB

Version 3.6.1 (and later) fixes this. The updated software can be obtained from
the publisher, The Learning Company.

RAM Doubler
=============
NOTE: RAM Doubler reports to the operating system that Virtual Memory is ON
(it's actually Extended Memory, but the Operating System flag is still the
same). If physical RAM is greater than 10 MB, and RAM Doubler is installed, the
same error message occurs. Solution: Disable the RAM Doubler extension or
contact Connectix for other solutions specific to RAM Doubler.

The Tech Info Library article titled "Locating Vendor Information" can help you
search for a particular vendor's address and phone number.

Article Change History:
07 Mar 1997 - Added new version info, vendor info; corrected error number.
