QuickDraw GX: Desktop Printing On/Off Retained After Quit (2/95)

=====  
Article Created: 18 August 1994  
Article Reviewed/Updated: 14 February 1995

TOPIC -----

With QuickDraw GX installed, if I disable Desktop Printing in one application, will it be disabled in all applications?

DISCUSSION -----

No, the Desktop Printing on/off setting is not a global setting. Changing the setting in one application affects that application only.

Additionally, quitting the application does not reset Desktop Printing. It will remain set as it was when the application was quit.
