QuickDraw GX: Read Me File Error and WorldScript II 7.2 (4/97)

=====
Article Created: 6 September 1994
Article Reviewed/Updated: 2 May 1997

TOPIC -----

The QuickDraw GX "URGENT--Read Me!" file that comes with System 7.5 installation disks states "Make sure you are using WorldScript II version 7.2 or later. QuickDraw GX is not completely compatible with versions of WorldScript II prior to 7.2." This information is incorrect.

DISCUSSION -----

Using WorldScript II v7.2 is not enough to ensure Apple language kit compatibility with QuickDraw GX under System 7.5.

Chinese Language Kit -----

An updater has been posted to many online services which will provide the Chinese Language Kit compatibility with System 7.5. The Chinese Language Kit Updater Version 1.0 updates the Chinese Language Kit to version 1.1.1.

Japanese Language Kit -----

Apple will release an update for the Japanese Language Kit in Spring 1995 time frame. The update will be compatible with System 7.5 and QuickDraw GX.

For users of the Japanese Language Kit who need immediate compatibility, they can run their language kit with System 7.5 using an interim update available on CompuServe, and the Internet. (Located in System Software directory).

These articles can help you locate the software update mentioned here:

- Where To Find Apple Software Updates
Lists online services for "free" Apple software updates.

- Obtaining Apple Product Support in the USA
Lists 800 numbers and online services for software updates, Apple support information, and a subset of the Apple Tech. Info. Library.

Article Change History:

01 May 1997 - Removed out dated on line references.

27 Feb 1995 - Added information about the CLK and JLK Updaters.
