Do Not Use Norton Speed Disk 3.0 (6/95)

=====

Article Created: 8 September 1994  
Article Reviewed/Updated: 28 June 1995

TOPIC -----

Do not use Norton Speed Disk 3.0.

DISCUSSION -----

Symantec Corporation reports a problem running Norton Speed Disk 3.0 for the Macintosh on any hard disk. Running this program can cause data loss on the hard disk. This report comes directly from Symantec. Symantec suspended shipment of this product and, in September 1994, replaced all units in retail stores with a 3.1 version. Symantec also shipped updates automatically to registered users and upgrade customers. If you did not automatically receive an update, they are available through Symantec customer service and several online services. Contact Symantec at (800) 441-7234 for additional information.
