At Ease 2.0.3: Corrects AppleCD 300 Plus Ejection Problem (8/95)

==

Article Created: 21 September 1994
Article Reveiwed/Updated: 14 August 1995

TOPIC ---

The read me file that comes with the AppleCD 300 Plus drive states:

WARNING: If you shut down your computer before you eject a disc while you are
using At Ease, the tray of the CD-ROM drive opens and then closes immediately.
If you attempt to remove the disc as the tray opens or closes, you may damage
the disc or the tray of the CD-ROM drive. (To remove a disc from the CD-ROM
drive after you have shut down your computer: Start up your computer, then
choose the Eject command from the Special Menu. Remove the disc and close the
tray by pushing it in or pressing the Open/Close button. Then you can shut down
your computer again.)

Does this problem occur in At Ease 2.0.3?

DISCUSSION --

With At Ease 2.0.3, this is no longer a problem. When a CD-ROM is inserted into
an AppleCD 300 Plus, and you choose Shut Down from the Special menu, the CD is
left in the drive. You can still choose Eject from the Special menu and the CD
is ejected from the AppleCD 300 Plus drive.
