GX Helper: Why You Can't Disable Desktop Printing (2/95)

===

Article Created: 21 October 1994
Article Reviewed/Updated: 14 February 1995

TOPIC ---

I noticed after installing GX Helper that I do not have the option to disable
Desktop Printing in some applications. Why is this?

DISCUSSION --

The option to turn off Desktop printing in the newest versions of Excel (4.0)
and Word (6.0) or other recent applications may not appear.

These applications are "GX-friendly" and can utilize the QuickDraw GX printer
drivers. Because of this, GX Helper does not let you disable Desktop Printing.
