TOPIC ---

Is there a compatibility problem with the Quadra 630 computer running AppleShare
4.0.2?

DISCUSSION --

As of April, 1995 the Quadra 630 has been qualified to be an AppleShare 4.0.2
host, running Mac OS 7.1 or greater.

If your Quadra 630 running AppleShare has crashing problems, these crashes may
be caused by SCSI problems that may be fixed with the 630 SCSI Update.
