CDU: Diffs Between Pre-Installed and Retail Versions (2/95)

=====
Article Created: 11 November 1994
Article Reviewed/Updated: 16 February 1995

TOPIC -----

Is the version of the Connectix Desktop Utilities (CDU) pre-installed on the Power Macintosh 8100/110 the same as the retail version?

DISCUSSION -----

Yes, the versions are identical except for how CDU is configured. When installing CDU from the disk, all options are turned on. This includes the Balloon Help menu being turned off.

Installing CDU from the Apple Extras folder on the Power Macintosh 8100/110 has only two options turned on - the menu bar display, which displays the disk space available, and the Energy Star features. All other power user type options, such as Balloon Help and Desktop Picture control, are turned off.
