Newton Power Organizer Pack Instruction Addendum (2/95)

=====
Article Created: 7 February 1995

TOPIC -----

This article contains the Newton Power Organizer Pack Instruction Addendum.

DISCUSSION -----

Newton Power Organizer Pack Instruction Addendum
=====

For Macintosh users:

These instructions replace the section "Installing Newton Package Installer" in the pamphlet "Installing Newton Packages Using Your Computer."

- 1) Unlock the Notion and NPI floppy disk by sliding the black tab in the upper-right corner of the disk so that it covers the square hole.
- 2) Insert the floppy disk into your disk drive.
- 3) Choose Empty Trash from the Special menu. Emptying the Trash will remove an outdated version of the software. You will not lose anything that you need on the disk.
- 4) Open the floppy disk icon.
- 5) Open the Newton Package Installer folder.
- 6) Select the Apple Modem Tool and the AppleTalk ADSP Tool and drag them to the icon of the System Folder on your startup disk.
- 7) You'll see a message asking whether you want to install these items in the Extensions folder. Click OK.
- 8) You may see a message asking whether you want to replace items with

the same name click OK.

- 9) If you wish to use NPI to install other Newton packages, drag the NPI icon from the Newton Package Installer folder to your hard disk.

Note: NPI is automatically placed on your hard disk when you install the ExpensePlus software (contained in the other envelope you received). If you plan to install ExpensePlus, you don't need to copy NPI to your hard disk.

- 10) Restart your computer by choosing Restart from the Special menu. The floppy disk is ejected.
- 11) After the Welcome to Macintosh screen appears, push the floppy disk back into the disk drive.
- 12) Newton Package Installer is now ready to use. Turn now to the section "Installing the Notion Software on Your Newton" in the pamphlet "Installing Newton Packages Using Your Computer."

For Windows Users:

You can ignore or delete the "!desktop.fol" folder on the Notion disk. It contains an outdated version of the software. Proceed as instructed in the pamphlet "Installing Newton Packages Using Your Computer."
