Pwr Mac DOS Compatibility Card: LSL.COM Not Included (2/95)

===

Article Created: 21 February 1995

TOPIC ---

I have a DOS Compatibility Card for the Power Macintosh, I am trying to use it
on a network. Our support personnel keeps asking me for a link support layer
LSL.COM. Where can I get this?

DISCUSSION --

LSL.COM is part of Novell Netware client software. If you are running a Novell
Netware network, the distribution disks will have LSL.COM. If not, you can get
LSL.COM from Novell's ftp site (ftp.novell.com) or by calling Novell and
ordering a site-license.
