PrinterShare: Not Enough Memory Error (International) (2/95)

===

Article Created: 22 February 1995

TOPIC ---

I am having problems using PrintShare with my StyleWriter II printer. Whenever I try to print, an error message appears on the screen stating that there is not enough memory to share the printer. I am using PrintShare v1.1.1 that ships with the French-Canadian version of System 7.5

DISCUSSION ---

This is a know issue with the French-Canadian version of PrintShare v1.1.1. However, there is a simple workaround. You can install PrintShare v1.1.1 that ships with the French-Canadian version of the Color StyleWriter 2400 software. Once you install this version of PrintShare, you can share your printer.
