PwrBook: Seeing Battery Level After System Update Install (4/95)

===

Article Created: 26 April 1995

TOPIC ---

After installing System 7.5 Update 1.0 on my PowerBook, the battery indicator in
the menu bar disappeared. How do I get the battery indicator back?

DISCUSSION --

The battery indicator, located in the menu bar to the left of the Balloon Help
menu, is an option with System 7.5. Open the "Date & Time" control panel and
select "Clock Options...". Check the "Show battery level" to regain the battery
level indicator.
