Power Macintosh 7100 CD Audio Connect Pinouts (5/95)

=====
Article Created: 5 May 1995

TOPIC -----

I need to build an audio cable for a non-Apple CD-ROM on the Power Macintosh 7100/66. What are the logic board connector pinouts?

DISCUSSION -----

Here are the pinouts for the CD-ROM Audio Connection on the Power Macintosh 7100.

Pin	Signal
1	CD in Left
2	CD Common
3	CD Common
4	CD in Right

The logic board connector is a J19, this connector is located behind the drive bays.
