Telecom Adapter 2.0 & Calling In To Get Messages (5/95)

===

Article Created: 16 May 1995

TOPIC ---

When using the Telecom Adaptor 2.0 and not forwarding to the PowerTalk Mailbox,
I had a problem with calling in to get messages. What do I need to do?

DISCUSSION --

There was an omission in the enclosed documentation. While the greeting message
is playing press "*" (asterisk) on the phone and you will be asked to enter the
password, then press "#" (pound) to continue.
