MAE: Installing Chinese or Japanese Language Kits (8/95)

==

Article Created: 14 August 1995

TOPIC ---

When trying to install either the Chinese, or Japanese Language Kit version 1.0
(version 1.1.1 is not compatible because it requires System 7.5), the following
error appears:

"The installer cannot update the version of Performa system software on the disk
'/'. Please read the file 'Read Me' on the disk 'Install 1' for more
information."

What needs to be done?

DISCUSSION ---

To properly install the Chinese or Japanese Language Kits (CLK or JLK), remove
the Launcher from the user's System Folder or use the Extension Manager to
deselect the Launcher. After restarting, the installer should work properly.
