Open Transport: Brief Review of Releases and Updates (5/96)

=====  
Article Created: 24 August 1995  
Article Reviewed/Updated: 27 May 1996

### TOPIC -----

This document outlines Open Transport releases and updates.

### DISCUSSION -----

Version 1.0 was the initial release of Open Transport and was included with early Power Macintosh 9500 computers.

The Open Transport 1.0.1 patch provides improved compatibility with PPP and SLIP software and other fixes, but it is strongly recommended that all Power Macintosh 9500 customers upgrade to version 1.0.6.

Version 1.0.6 is included with all new PCI-based Power Macintosh computers. Customers who previously bought a Power Macintosh 9500 can get an upgrade to the new software by calling the Apple Order Center.

The Open Transport 1.0.7 patch provides improved compatibility with PPP and SLIP software and other fixes.

The Tech Info Library article titled "Locating Vendor Information" can help you search for the Apple Order Center's phone number.

These articles can help you locate the patch software updates mentioned here:

- "Where To Find Apple Software Updates" -- Lists online services for free Apple software updates.
- "Obtaining Apple Product Support in the USA" -- Lists 800 numbers and online services for software updates, Apple support information, and a subset of the Apple Tech Info Library.
