Power Macintosh 5200/5300:Multimedia Learning Tools Bundle(9/95)

=====

Article Created: 14 September 1995

TOPIC -----

This article describes the Multimedia Learning Tools Bundle for the Apple Education Series. The Apple Education Series (AES) is a series of products specifically intended for the effective use of technology in education. This bundle is only available in the Apple Education market, not in any other reseller channels.

DISCUSSION -----

Overview =====

The Apple Education Series (AES) Multimedia Learning Tools bundle is the latest in the AES series for K12 institutions. Multimedia Learning Tools is intended to enable students and teachers to easily create multimedia projects using text, video, pictures, animation, and sounds. Bundled software includes authoring tools, design tools, and content ready for students and teachers to paste right into their projects.

Features =====

High quality software -----

Saves time in reviewing software for purchase because Apple reviewed the products for you.

Multimedia resources -----

Includes a variety of text, photographs, clip art, movies, backgrounds, charts, graphs, music, sound effects, and historical information which students can paste into their projects.

Multimedia projects

Developed by teachers, these projects walk teachers and students through the creation of exciting multimedia projects while focusing on interdisciplinary and collaborative learning techniques.

Textbooks

Provide step-by-step instructions for beginning authoring, and information on what teachers are doing with multimedia.
