SimpleText: Always Downloads Chicago Font (9/95)

==

Article Created: 29 September 1995

TOPIC ---

When printing from SimpleText to any LaserWriter, using the LaserWriter 8.x
driver, I noticed it downloads Chicago during the printing process. It does not
matter what fonts are included in the document, Chicago gets downloaded every
time. This occurs on any version of SimpleText or LaserWriter 8 driver I have
tried.

DISCUSSION --

Chicago is the font used internally by the SimpleText for the page numbers at
the bottom of each page. If the Chicago font is not already present in the
printer's memory, it is downloaded to your printer with each print job.
