Personal Internet Solution: Description & Specifications 4/97

=====
Article Created: 28 November 1995

TOPIC -----

This article describes the Personal Internet Solution Bundle, part of the Apple Education Series.

DISCUSSION -----

The Personal Internet Solution Bundle offered to education customers is intended to provide librarians, administrators, students and individual teachers easy access to the Internet.

Features And Benefits
=====

Feature - Power Macintosh 5200/75 LC or Macintosh LC 580 computer.

Benefit - Apple latest education computers offer expandability, compatibility and high performance including a CD ROM drive.

Feature - Internet software package.

Benefit - Offers some of the most popular Internet applications including Netscape Navigator for Web browsing, Eudora by Qualcomm for electronic mail, and an Internet serial line connection package with custom configuration script.

Feature - Reference CD Collection

Benefit - Four of the best known reference CDs available to bring the world of information into the classroom. Allows users to begin research locally and then venture out into the Internet for additional data and insight.

Feature - Global Village 14.4 external Data and Fax Modem

Benefit - Without additional modem purchase, allows connection to Internet and online services. Allows faxing from the computer.

Feature - Getting Started Guide

Benefit - Give users an easy-to-follow and complete guide to setup of the bundle.

Feature - Portal Information Network Internet provider connection.

Benefit - Up to \$75 connect time credit, no setup fee, and up to three monthly maintenance fees waived from this popular Internet access provider with more than 1100 local access numbers servicing up to 95% of the US.

Feature - Discount coupons for educational reference materials.

Benefit - Savings on even more relevant resources.
