AppleShare Client for Windows Manual Has Wrong Version (4/96)

=====
Article Created: 12 December 1995
Article Reviewed/Updated: 22 April 1996

TOPIC -----

In the "Getting Started with AppleShare Client for Windows" documentation, the version number is 1.0.1. Isn't the version number 1.0.2?

DISCUSSION -----

Yes the version is 1.0.2. In the final moments of finishing AppleShare Client for Windows 1.0.1, a fix was incorporated which changed the version to 1.0.2. Unfortunately, at that point in the process, the manuals were already printed.

The correct version number has been added in these online files:

- PROBLEMS.WRI
- USERINST.WRI
- README.TXT

Also, the disk image files of AppleShare Client for Windows included on the AppleShare 4.2 CD are listed as version 1.0.1 rather than 1.0.2.

A documentation errata was included in the README.TXT file which reads as follows:

Documentation errata -----

Your documentation may refer to this product as AppleShare Client for Windows version 1.0.1. AppleShare Client for Windows 1.0.2 includes a recently developed change to ensure correct installation on systems running NetWare. This minor improvement is the only difference between the two versions.

Article Change History:
22 Apr 1996 - Added information on the AppleShare 4.2 CD.
