Personal Internet Solution Bundle & Global Village Issue (1/96)

=====================================================================

Article Created: 5 January 1996

TOPIC -------------------------------------------------------

I received my new Personal Internet Solution Bundle with an external Global
Village Gold II modem. How can I use this modem for Faxing with the software
provided?

DISCUSSION -------------------------------------------------------

The Personal Internet Solution Bundle does not include Global Village modem
software. The bundle only comes with the CCL, or modem script, for connecting a
Global Village Gold II modem with the Internet. Because this modem was to be
used with bundled Internet-specific software, the Global Village software was
not going to be needed.

If you want to send Faxes, contact Global Village technical support to obtain
TelePort/GlobalFax software. The Tech Info Library article titled "Locating
Vendor Information" can help you search for a particular vendor's address and
phone number.
