Open Transport: User Configuration Not Available (1/96)

=====
Article Created: 10 January 1996

TOPIC -----

I am running Open Transport 1.0.6 on my computer, and I need to set the AppleTalk address manually. The option for User Configuration in the AppleTalk control panel, when set to Ethernet, is dimmed.

DISCUSSION -----

This option is not available in Open Transport 1.0.7 or lower, but it is available in Open Transport 1.0.8 and higher in Advanced User Mode.
