Newton 2.0 OS: Recommended modems list (2/96)

=====

Article Created: 21 February 1996

TOPIC -----

To assist our customers in meeting their communications needs, Apple has compiled a listing of recommended modems for use with the MessagePad 120 with the Newton 2.0 Operating System.

DISCUSSION -----

While a sample of each of these modems has been tested by Apple, modem manufacturer specifications are subject to change without notice, resulting in potential incompatibilities. Accordingly, Apple Computer, Inc. cannot guarantee the operability of any individual modem and will not be liable for damages resulting from the use of this information. Not responsible for typographical errors. Please contact the manufacturer for additional information.

Begin_Table
