System 7.5.3: Compatibility Issue With Radius SoftPivot (4/96)

=====

Article Created: 8 April 1996

TOPIC -----

I am using a Radius SoftPivot display on a Power Macintosh 7100. After I installed System 7.5 Update 2.0, the display software did not work correctly. The screen redraws only around the mouse pointer. The same behavior happened on my Macintosh IIsi with a SoftPivot display after installing System 7.5 Update 2.0.

DISCUSSION -----

There is an incompatibility problem with the SoftPivot 3.2.1 control panel and System 7.5 Update 2.0. Radius Technical Support is aware of the problem and are looking into the incompatibility issues. The only workaround is to disable the SoftPivot 3.2.1 control panel when using System 7.5 Update 2.0 (System 7.5.3).
