Power Macintosh 5260/100: Description (4/96)

=====
Article Created: 10 March 1996
Article Reviewed/Updated: 15 April 1996

TOPIC -----

This article contains a description of the Power Macintosh 5260/100 computer.

Note: This computer is only available through educational channels.

DISCUSSION -----

The Power Macintosh 5260/100 computer brings 100-MHz PowerPC processor performance to a new low cost. And this is a system that can grow as your needs change, with such options as 256K of Level 2 cache memory to further boost processor performance, and a wide variety of multimedia, networking, and communications expansion cards.

The Power Macintosh 5260 is an all-in-one system, so it's economical, easy to set up, and easy to start using. And it's optimized for multimedia, with built-in features and expansion slots that let you enjoy stunning graphics, video, and audio now, and add advanced features later.

Already included in the main unit are a 14-inch color display (diagonal viewable image size 12.3 inches), an 800-megabyte hard disk, a 1.4 MB floppy disk drive, a quadruple-speed CD-ROM drive, a microphone, and stereo speakers. The whole system is on a tilt-and-swivel base that lets you position it precisely for the most comfortable viewing. A keyboard and mouse are also provided.

The 16-bit sound provides high-quality audio playback through the built-in stereo speakers or external speakers (not included). You can record voice, music, and other audio of your own choosing through the front microphone or the rear audio-input port.

Multimedia expansion is easy on the Power Macintosh 5260 computer. Your computer comes with special slots for video-input, TV-tuner, and communications or networking cards. A general-purpose slot supports a variety of expansion

options, such as an MPEG card for viewing CD-ROM-based movies and interactive "edutainment" programs. You can also add video-output capability to display your Macintosh screen on a TV or a projection system, or to record your work on a VCR.

Features

=====

Complete, ready-to-use system

- Computer, 14-inch color display (12.3-inch diagonal viewable image size), CD-ROM drive, floppy disk drive, hard disk, micro-phone, and speakers built into one unit
- Matching keyboard, mouse, and all necessary cables
- Apple System 7.5 software, including Apple Guide software for step-by-step help with basic system operation, and QuickTime multimedia software
- Built-in quadruple-speed, tray-loading CD-ROM player
- Front-panel volume control and headphone/speaker jack
- CD-quality digital sound

Ordering Information

=====

Power Macintosh 5260/100

- Computer with built-in 14-inch display (12.3-inch diagonal viewable image size), 800MB hard disk, quadruple-speed CD-ROM drive, and Apple SuperDrive floppy disk drive. Mouse, keyboard, and cables also included.
- Order No: M4982LL/A

Optional Enhancements

- High Performance Module
(256K Level 2 Cache)
Order No. M4849LL/A
- Apple MPEG Media System
Order No. M4243LL/A
- Apple Video System
Order No. M2894LL/C
- Apple TV/Video System
Order No. M2896LL/C
- Apple External Video Connector
Order No. M4099LL/A
- Apple Presentation System
Order No. M2895LL/A
- Apple Ethernet CS Twisted-Pair Card
Order No. M3065Z/A

- Apple Ethernet CS AAUI Card

Order No. M3066Z/A

- Apple Ethernet CS Thin Coax Card

Order No. M2708Z/A
