Hebrew and Arabic Language Kits: System 7.5 Update 2.0 (4/96)

==

Article Created: 25 April 1996

TOPIC ---

The Read Me file for the Hebrew and Arabic Language Kits does not mention System
7.5 Update 2.0. Is it supported with these Language Kits?

Also, I noticed that the ReadMe states that LaserWriter 8.3 and StyleWriter 1200
drivers will be installed if they are not already present. If I have System 7.5
Update 2.0 installed, and then install the Language Kits, will I have older
versions of the LaserWriter 8 and StyleWriter 1200 printer drivers?

DISCUSSION --

System 7.5 Update 2.0 is supported with the Language Kits. If System 7.5 Update
2.0 is installed, and then the Hebrew or Arabic Language Kit is installed, you
will still have LaserWriter 8 version 8.3.3 and StyleWriter 1200 version 2.1.1,
which are installed by System 7.5 Update 2.0.
