PCI-Based Power Macintosh: Speed of Processor Upgrades (4/97)

=====
Article Created: 3 May 1996
Article Reviewed/Updated: 29 April 1997

TOPIC -----

Which PCI-based Power Macintosh computers will be able to support future processor card upgrades? What is the fastest processor card these computer could support?

DISCUSSION -----

Currently, all PCI-based Power Macintosh computers that are capable of accepting processor upgrade cards will be able to support cards of up to 250 MHz. These computers include the Power Macintosh 7300, 7500, 7600, 8500, 8600, 9500 and 9600 series computers.
