MAE 2.0: Appropriate Version of STREAMS With HP-UX 9.0.x (5/96)

===

Article Created: 30 May 1996

TOPIC ---

This article explains which version of the STREAMS package included on the MAE
CD-ROM disc is appropriate for HP-UX 9.0.x. STREAMS is not necessary for either
HP-UX 10.x, or for Solaris, because it's built into the OS.

NOTE: Apple has licensed the STREAMS package from HP for use with the AppleTalk
kernel components within MAE. If a user has an issue with the STREAMS package,
they should to contact their HP support representative.

DISCUSSION --

Begin_Table

HP-UX Version	STREAMS version
9.0.1	STREAMS3
9.0.2*	STREAMS3
9.0.3	STREAMS3
9.0.4*	STREAMS5
9.0.5	STREAMS5
9.0.7	STREAMS5
9.0.8*	STREAMS5

End_Table

* These HP-UX version are also released for the HP9000 Series 800 systems,
however, these OS versions will load on the HP9000 Series 700 systems. MAE is
intended only for the HP9000 Series 700 systems.
