Network Assistant: Sys Information Report Maximum Width (7/96)

==

Article Created: 28 June 1996
Article Reviewed/Updated: 11 July 1996

TOPIC ---

I am using Network Assistant to create a System Information report for the
Macintosh computers on my network. I have a maximum of 630 pixels that can be
used for the report. How can I efficiently predetermine the items I want to
select for a report and stay within the 630 pixel maximum?

DISCUSSION --

The maximum width of the System Information report is determined by the
resolution of your monitor. When the screen resolution is 640 X 480 the maximum
width of the report is 630 pixels. If the screen resolution is set to 1024 X 768
the maximum width of the report is 1,014 pixels.

The workstation is always the first field in the report. When you generate a new
 report, this field along with the report window require 167 pixels. When the
monitor resolution is set to 640 x 480, you have 463 Pixels for the remaining
fields.

Since you are not going to be able to get all the fields into one report, a good
strategy would be to generate reports with like fields. Multiple reports can be
left open for on screen viewing.

You can also print or export the report to a text file. If you want to know more
about printing or exporting a report please refer to Part 3 in the Apple Network
Administrator Toolkit manual page 55 "Printing and Exporting to a text file ".

The table below shows the number of pixels each field uses:

Begin_Table

System SW Version	75	Mouse Connected	75
Built-In Memory	65	Keyboard Connected	75

```
Virtual Memory        65     Printer Type          130
System SW Memory      75     Printer Version        65
RAM Disk Size         75     Printer Name          130
Free Disk Space       75     Network Type           75
Total Disk Space      75     Appletalk Version      75
File Sharing          60     Appletalk Zone        130
Processor             85     Appletalk Network #    75
Monitor Size          85     Appletalk Node #       75
Monitor Setting      110     TCP/IP Address        110
2nd  Monitor Size     85
2nd Monitor Setting  110
