System 7.5.5 Update: For Non-US Systems Read Me (10/96)

=====
Article Created: 17 October 1996

TOPIC -----

This article is the System 7.5.5 Update, For Non-US Systems ReadMe file.

DISCUSSION -----

Important information about System 7.5.5 Update for customers using non-U.S. English systems

On September 19, 1996, Apple Computer released System 7.5.5 Update for U.S. English systems. If your computer does not have the U.S. English version of System 7.5.3, you should not attempt to download and install the System 7.5.5 Update files located in this directory. As stated in the press update and Q&A document, Apple expects localized versions of System 7.5.5 Update to be available in many countries within 90 days after the U.S. introduction. Please contact your local Apple support center for local availability.
