Newton Connection Kit: Isn't Compatible w/ Newton 2.0 OS (11/96)

=====
Article Created: 18 November 1996

TOPIC -----

I recently upgraded my Apple MessagePad 120 with the Newton 1.x OS to a Apple MessagePad 130 with the Newton 2.0 OS installed. I can no longer get my Newton Connection Kit to work. Why?

DISCUSSION -----

You cannot use the Newton Connection Kit with the Newton 2.0 OS. A replacement for the Newton Connection Kit will be available from Apple Computer, Inc. at a later date. In the meantime, look at the Tech Info Library article titled "Newton OS 2.0: Newton Connection Utility Alternatives". This article proves several options for transferring data from a Newton 2.0 OS device to both a Macintosh or Windows computer.

You can also use the Newton Backup Utility to backup and restore the information on you Apple MessagePad 130 device.

This article appeared in the 18 November 1996 issue of the Infomation Alley.
