Newton OS 2.0: CSTW 2200 Printing Errors with Some Apps (1/97)

==

Article Created: 24 January 1997

TOPIC ---

I am using a Color StyleWriter 2200 printer with my Newton 2.0 device. Sometimes
I get an error when printing stating the Newton device has lost contact with the
printer.

DISCUSSION --

This happens because there is a partial incompatibility between the Color
StyleWriter 2200 and printing from some third-party Newton applications. Not all
Newton Applications are affected. Apple Computer, Inc. does not currently have a
fix for this issue.
