PC Compatibility Card: Drive Container Size Limit (2/97)

=====  
Article Created: 11 February 1997  
Article Reviewed/Updated: 25 February 1997

TOPIC -----

When I create a 2 GB drive container for use with the PC Compatibility Card, the PC crashes and other problems occur. If the drive container is only 500 MB, everything works fine. What is wrong?

DISCUSSION -----

Only drive containers that are 1023 MB or less are supported. Any drive container larger than 1023 MB could cause your machine to crash when it is in the PC environment.
