Network Assistant & Copying Invisible Files (2/97)

=====  
Article Created: 18 February 1997

TOPIC -----

This article describes which invisible files Network Assistant can be copied from a hard disk.

DISCUSSION -----

Network Assistant, part of the Apple Network Administrator Toolkit (ANAT), will not copy invisible files at the root (first) level of the hard disk. This includes the desktop folder, trash, temporary items folder, and others.

Network Assistant can copy invisible files that are not at the root level of the hard disk.
