Newton Internet Enabler: Overview (4/97)

===

Article Created: 14 April 1997

TOPIC ---

This article offers an overview of the Newton Internet Enabler.

DISCUSSION --

The Newton Internet Enabler (NIE version 1.0) - TCP/IP provides capabilities for
the Newton 2.0 platform. Use and knowledge about this product is covered and
bound by the terms of the license you will need to execute with Apple Computer,
Inc.

NIE v1.0 offers:
- Support for TCP and UDP protocols
- over PPP and SLIP
- domain name resolver
- dialer with scripting capability

NIE v1.0 enables dial-up access to an Internet Service Provider (ISP) or any
IP-based solution, including web browsers or POP/SMTP mail. Enclosed with the
packages you will also find sample code and reference documentation. Please be
sure to read the release notes for issues that may arise using NIE 1.0.
