PowerBook 3400: Speakerphone/Voicemail Capability (4/97)

=====
Article Created: 15 April 1997

TOPIC -----

Can I use the PowerBook 3400 as a speaker phone/voice mail system like I can with some desktop Power Macintosh systems?

DISCUSSION -----

The internal PowerBook 3400 33.6 modem does not currently work with any Apple or third-party speaker phone/voice mail software. However, the PowerBook 3400 can be used as a full-functioning speaker phone and voice mail system when used with a GeoPort Telecom Adapter and PlainTalk microphone.
