### TITLE

Power Macintosh G3 (Blue and White): Possible to Use  
Both ADB and USB Devices

Article ID: 58223  
Created: 1/4/99  
Modified: 1/11/00

---

### TOPIC

Since the Power Macintosh G3 (Blue and White) has both ADB and USB ports, can I mix and match input devices?

---

### DISCUSSION

Yes, it is possible to use both USB and ADB input devices on the Power Macintosh G3.

Be aware that if you have two similar input devices, such as a USB mouse and an ADB mouse, connected simultaneously, the results are unpredictable and it is not recommended. However, using a USB mouse with an ADB keyboard for example is fine.
