TOPIC ---

I have a question about TCP/IP on A/UX 2.0:

Is there a TLI interface (transport level) and/or a DLPI interface (network
level)? (These interfaces are defined by AT&T and are standard in System V
4.0.)

DISCUSSION --

A/UX 2.0 is designed to meet the AT&T System V level 2 specification. We do
not provide a Transport Level Interface or a Network Level Interface.
