A/UX: Unwanted Logoff with Ctrl-C

=====
Article Created: 29 October 1990

Article Change History

08/31/92 - REVIEWED
• For technical accuracy.

TOPIC -----

When using telnet or rlogin to log in to another system from the Bourne shell, the system logs me off when I hit Ctrl-C to interrupt a process.

DISCUSSION -----

Use the C-shell (csh) and set the ignoreeof flag.
