TOPIC -----

I have an Apple III. Is there a port on it that I can use to hook up an Epson Parallel Printer? If not, what do I need to do to connect the printer?

DISCUSSION -----

No, the Apple III does not have a built-in parallel port.

Instead, you need the Universal Parallel Interface Card 661-91007 and cable 590-0036. The driver is a printer driver with the following configuration block:

```
0 1 2 3 4
0E 00 00 00 00
```
