Apple Media Tool: PICT Files in Sequence Problem (10/94)

=====
Article Created: 18 October 1994
Article Reviewed/Updated: October 26, 1994

TOPIC -----

I have a series of PICT files that I want to appear in sequence, one after another. The duration of each PICT is set to the same length, but when the project is run, it only displays the first and last PICTs, disregarding the timing set in the "Duration" option. It appears that the duration clock for all objects is started when the clock is started for the first PICT.

DISCUSSION -----

Screens may not run properly unless you close the screen window before running. Always run tests from the Map window with all Screen windows closed.
