Apple Network Servers: How to Get Replacement Keys (9/96)

=====
Article Created: 13 March 1996
Article Reviewed/Updated: 17 September 1996

TOPIC -----

How can I get additional or replacement keys for our Apple Network Servers? I lost mine. Also, can I obtain a single master key for all my servers since I have more than one?

DISCUSSION -----

If you lose your keys, an Authorized Apple service provider can order a set of new keys with new locks, but you cannot get additional or replacement keys without new locks. However, it is your option to have a locksmith make additional or replacement keys for you as long as the Apple hardware is not damaged in the process which would void your warranty.

An authorized Apple service provider can order the following replacement service part for you:

0922-2084 Lock, Front & Rear with Keys*

At the present time there is no plan to offer a master key. However, depending on demand from customers, this may be implemented in the future.

* Part numbers mentioned in this article are accurate as of this writing. Before ordering, verify that they are still correct as they are subject to change.
