AIX: Backspace Does Not Work in Command Shell Utility (2/97)

=====
Article Created: 19 February 1997

TOPIC -----

The command shell utility supplied with the AIX on the Apple Network Server does not let the user use the back space key.

DISCUSSION -----

The easiest solution is after the user has a command shell login, type:

```
set -o emacs
```

This will correct backspace key mapping.
